

LUXOR 300 X 300 CM PAVILION SAND

Art nr: HT37130303

The Luxor Pavilion features a dark brown metal frame, with a roof and walls made of sand-colored polyester fabric, weighing 220 grams. The pavilion is sold as a sunshade and comes complete with a roof, side walls, and a mosquito net. Metal stakes are included to anchor the pavilion to the lawn. The mosquito net and side walls can be used separately. You can have both the mosquito net and/or side walls on one or more sides of the pavilion, while leaving the other sides completely open. A centered hook on the underside of the roof is perfect for hanging lights or other decorations. The upper roof section (80x80 cm) allows for ventilation, making it easier for air to flow through the pavilion.
